Manage work resources more effectively and efficiently, control costs and provide better services

Today, organizations are under increasing pressure to improve productivity, manage work resources more effectively and efficiently, control costs and provide better services with fewer resources than ever before. The above requirements drive the organization to implement automated time and attendance systems, while also improving the management of human resources.

Most organizations agree that the immediate benefits of automating time and attendance management are the elimination of paperwork and streamlining of payroll processing. Additionally, automation can free the administrators, supervisors, payroll staff and employees to perform other functions.

For smaller businesses, we have developed a special time and attendance kit, while the larger systems use a similar hardware architecture, as in the case of an access control. The common elements of access control and time and attendance systems are identification means (e.g. contactless cards) and, in some cases, the software (e.g. Codeks).

Regis R
- T&A controller
- OLED display and illuminated buttons
- Built-in card reader
- Protection: IP54
- Stores up to 30.000 users and 100.000 events
- RS-485 communication

Regis S
- T&A controller
- 3" LCD touch screen (resolution: 480 x 270 px)
- Configurable touch screen keypad
- Built-in card reader
- Stores up to 30.000 users and 100.000 events
- RS-485 in TCP/IP communication

Regis F
- T&A controller3" LCD touch screen and
- fingerprint reader
- Configurable touch screen keypad
- Built-in card reader
- Stores up to 500 fingerprints, 30.000 users
- and 100.000 events

Regis H
- T&A controller
- 4,3" LCD touch screen (resolution: 480 x 270 px)
- Configurable touch screen keypad
- Built-in card reader
- Stores up to 30.000 users and 100.000 events

Regis T
- T&A controller
- 7" LCD touch screen (resolution: 1024 x 600 px)
- Configurable touch screen keypad
- Built-in card reader
- Stores up to 30.000 users and 100.000 events

Regis Z
- Portable time and attendance registrator
- 3" LCD touch screen (resolution: 400 x 240 px)
- Built-in card readerStores up to 30.000 users and 100.000 events
